

Product Information

Date: November 6th, 2014

Product: IPRS7 IP/GPRS PC Receiver Software

Subject: New firmware version 4.0.51 released.

Downloads: To go to the IPRS7 firmware download page, [click here](#)

**requires user login and password to download*

New Features: **Paradox Insight HD77 Camera**

The first and only integrated solution to deliver HD video and audio monitoring with superior security capabilities for visual verification.

Video Streaming and Alarm Events.

Central Monitoring Station (CMS) receives video after alarm notifications for efficient event reporting, dramatically reducing false dispatches with instant video/audio notifications.

The CMS can access up to 15 minutes of video after an alarm, configurable only by the Master user.

In addition to Email notification the central monitoring station will receive 10 x JPEG stills (3 pre-events and 7 JPEGs at one second intervals)

360p encrypted 10 second video with 3 second pre-recording.

For a complete tour of the IPRS7 and Paradox Insight features please click on the link below.

Selectable Output to the Automation Software

It is now possible to select IP in the output settings to communicate with the CMS software.

Import of Account Database from IPR512

A new feature has been implemented to import the account database from the memory card of the IPR512 to the IPRS7.
