

MG6250
2-Partition 64-Zone Wireless Console with GPRS/GSM
Version 1.6

Section Programming Guide

Things You Need to Know

About this Programming Guide

The MG6250 All-in-one Wireless Console can be programmed using either menu-based programming, or the section-based method described in this manual. For complete details on the menu-based approach, refer to the MG6250 Menu Programming Guide. This guide contains a list of programmable sections and supplemental programming information, which are not included in the menu programming guide. As a result, use this programming guide in conjunction with the MG6250 Menu Programming Guide when installing and programming your console.

Document Conventions

The following typographical conventions are used throughout this guide:

Type	Description
DEFAULT SETTINGS	Values which appear in bold typeface signify the default value: e.g., <input type="checkbox"/> 6 Digits ▲ 4 Digits (4 digits is the set default value)
SECTION NUMBERS AND KEYPAD KEYS	Section numbers and keypad keys will also appear in bold typeface, enclosed by brackets: e.g., section [0440]
Warning	Warnings will appear in bold typeface: e.g., WARNING: Important information
Note	Notes will appear in blue typeface: e.g., NOTE: Suggestion or reminder

Installer Code

To enter programming mode, enter the installer code (**0000/000000**). This mode allows the installer to program all features and options of the console, except for user codes. The installer code can be four or six digits in length. To change the installer code, refer to the MG6250 Menu Programming Guide.

Maintenance Code

Similar to the installer code, the maintenance code allows you to enter programming mode and program all sections, except for user codes and communication settings – these sections can only be accessed using the installer code. Since there is no default code, refer to the MG6250 Menu Programming Guide to set a default.

System Master Code

The system master code (**1234/123456**) allows the master to utilize any arming method, as well as program user codes. This code can be either four or six digits in length. The system master code cannot be changed by the installer or maintenance code.

System Reset

To reset the system to its default factory settings, press and hold the * and # buttons during system power-up, or access section **[9000]**. For more information, refer to *MG6250 Reset Sections* on page 3.

Demo Mode

Demo mode provides a quick preview of the console's visual and audible features. Upon entering demo mode, the console plays a sequence of these features, such as playing its intro and greeting, as well as flashing LEDs and sounding tones and sirens. Demo mode is only accessible via the system master code (default **1234/123456**) and can be accessed as follows:

Menu>08-System Setup>Enter Code>12-Demo Mode.

Entering Programming Mode

To enter programming mode, proceed as follows:

1. Press and hold **0**.
2. Enter your installer code (default is **0000/000000**). See *Installer Code* on page 2 for details.
3. Enter the four-digit section you wish to program.
4. Enter the required data and record your settings using the worksheets included in this guide.
5. Press the * key to clear data or to go back one step. Press the # key to save changes.

WARNING: To enter programming mode, all zones must be disarmed and StayD mode deactivated.

Data Entry

There are two methods that can be used to enter data when in programming mode: Single Digit Data Entry and Feature Select Programming methods.

Single Digit Data Entry Method

After entering programming mode, some sections will require that you enter decimal values from 000 to 255. Other sections will require that you enter hexadecimal values for 0 to F. The required data will be clearly indicated in this guide. When entering the final digit in a section, the MG6250 console will automatically save and advance to the next section. See *Decimal and Hexadecimal Programming Table* on page 3 for details on the various keys, and their equivalent decimal and hexadecimal values.

Feature Select Programming Method

After entering certain sections, eight options will be displayed where each option from **1** to **8** represents a specific feature. Press the key corresponding to the desired option and the option number will appear in the LCD screen. This means the option is ON. Press the key again to remove the digit from the LCD screen (* appears), thereby turning the option OFF. Press the * key to set all eight options to OFF. When the options are set, press the # key to save and advance to the next section.

Decimal and Hexadecimal Programming Table

Certain sections may require the entry of one or more hexadecimal values. Refer to table 1 for a description of the decimal and hexadecimal values.

Table 1: Decimal and hexadecimal values

Key	Value or Action
2	Hexadecimal values: A/B/C
3	Hexadecimal values: D/E/F
OFF	Deletes value entered
STAY	Toggle between uppercase and lowercase characters
SLEEP	Enter special characters

Installer Quick-keys

Installer quick-keys provide shortcuts for certain system actions. Refer to table 2 for a description of these quick-keys.

To access the installer quick-keys:

1. Press and hold **0**.
2. Enter your installer code (default is **0000/000000**), or maintenance code.
3. Press the required quick-keys (see table 2).

Table 2: Installer quick-key values

Key	Value or Action
OFF	Test Report: Sends the test report code programmed in section [1701] to the monitoring station.
STAY	Cancel Communication: Cancels all communication with the PC software or with the monitoring station until the next reportable event.
SLEEP	Answer PC Software: Forces the console to answer an incoming call from the monitoring station that is using the PC software.
PHONE	Call PC Software: Dials the PC telephone number programmed in section [1041] in order to initiate communication with a computer using the PC software.
ARM	Installer Test Mode: Allows you to perform walk tests where the siren will squawk to indicate opened zones. Press the ARM key again to exit.
#	Output Reset: Resets all outputs (on-board and wireless outputs) to their normal state. The normal state of on-board output is set via section [2005].

MG6250 Reset Sections

Table 3: MG6250 Reset sections

Section	
[9000]	Resets all programmable sections to factory default values
[9001]	Resets master code
[9002]	Removes module scan (clears missing GPRS module/SIM card trouble)
[9003]	Set EN 50131 defaults

Zone Programming

NOTE: If a device is assigned to a zone which is already programmed, a wireless zone will overwrite a hardwire zone.

Zone Definition Values

To program zone definitions and assign options:

1. Press and hold **0**.
2. Enter your installer code or maintenance code.
3. Enter the four-digit zone you wish to program.
4. Enter the two-digit zone definition, refer to table 4.
5. Assign the partition, refer to table 5. By default, all zones are assigned to partition 1.
6. Select or de-select zone options using buttons **1** through **8**, see table 6 or table 7.
7. Press the # key to save and proceed to the next zone. Repeat steps 3 to 6 for all remaining zones.

Table 4: Zone definitions

Input Value	Description	Arming Type			
		OFF	Stay Arm	Sleep Arm	Full Arm
00	Disabled (default)	-	-	-	-
01	Entry delay 1*	Not armed	Entry delay 1	Entry delay 1	Entry delay 1
02	Entry delay 2*	Not armed	Entry delay 2	Entry delay 2	Entry delay 2

35	Custom template 3	Not armed	Entry delay 1	Instant	Entry delay 1
36	Custom template 4	Not armed	Instant	Instant	Entry delay 1

*: Zone definitions that can be used in custom zone templates.

-: Zone definitions remain the same, regardless of arming type.

†: WARNING: Do not use these definitions for a common zone. The definition of a common zone follows the definition relative to the area that gets the lowest level of arming. A problem may occur if a common zone follows an area armed in Stay/Sleep and an area armed in Full. The resulting zone definition will be the one relative to the lowest level of arming which is Stay armed. The zone will be considered as armed in both areas.

Table 5: Partition assignment

Partition assignment	
Input Value	Description
1	Assign to partition 1
2	Assign to partition 2
3	Assign to both partitions

Table 6: Zone options

Zone options		
Input Value	Description	
1	Auto zone shutdown	
2	Bypassable zone	
3	RF zone supervision	
6	Intellizone delay	
7	Delay arm transmission

Assigning a Remote Control

1. Enter the remote's respective section (see *Programming Remote Controls* on page 12).
2. Press any button on the designated remote twice, or manually enter the serial number.

Deleting a Remote Control

1. Enter the remote's respective section (see *Programming Remote Controls* on page 12).
2. Enter **000000**.

Remote Control Button Assignment

Refer to table 8 for details on button options for the MG6250 remote controls. The MG6250 Console supports the following remote controls: REM1, REM2, RAC1, RAC2, REM3, REM15, and REM101.

Table 8: Button options for MG6250 remote controls (see *Decimal and Hexadecimal Programming Table* on page 3)

Option	Description
0	Empty/button disabled
1	Disarm
2	Stay arm
3	Sleep arm
4	Full arm
5	Activate window mode (StayD)
6	PGM activation 1 (event group 08)*
7	PGM activation 2 (event group 09)*

Option	Description
8	PGM activation 4 (event group 10)*
9	PGM activation 5 (event group 11)*
A	PGM activation 6 (event group 12)*
B	PGM activation 7 (event group 13)*
C	Panic 1
D	Panic 2
E	Panic 3
F	Paramedic alarm

* For descriptions on the event groups, refer to section *Description of MG6250 Events* on page 35.

* 000 = No tone; 001 = Beeping; 002 = Countdown; 003 = Tonality 1; 004 = Tonality 2; 005 = Tonality 3; 006 = Tonality 4

Daylight Savings Time Feature

Country Codes

Table 9 lists countries and their respective codes. This information is required when programming section [2045] for the Daylight Savings Time feature. To enable this feature, refer to section [2002], option 5, on page 30.

Table 9: Country codes for the MG6250

Input Value	Country
00	Mexico; St. Johns; Bahamas; Turks and Caicos
01	Cuba
02	Brazil
03	Chile
04	Falkland Islands
05	Paraguay
06	European Union; United Kingdom; Greenland
07	Russia and surrounding countries
08	South Australia; Victoria; Australian Capital Territory; New South Wales
09	Tasmania; Lord Howe Island

Input Value	Country
10	Chatham
11	Tonga
12	Iraq; Syria
13	Israel
14	Lebanon; Kyrgyzstan
15	Palestine
16	Egypt
17	Namibia
18	Canada; United States
19	New Zealand

Section	Description	Data	
[2045]	Country code	____/____	value from 00 to 99

Description of MG6250 Events

The following tables provide a listing of the events that can occur on the MG6250 Console.

NOTE: In the Area column, 1 and 2 refer to areas 1 and 2, respectively; whereas 3 refers to both partitions.

Non Reportable Events/Non Saved Events

Table 10: Non Reportable Events/Non Saved Events

Event	Event Description	Sub-event	Sub-event Description	Area
00	Zone OK	01 - 64	Zone number	
01	Zone open	99		1, 2, 3
02	Partition status	02	Silent alarm	1, 2, 3
		03	Buzzer alarm	
		04	Steady alarm	
		05	Pulse alarm

Entering Information

When programming certain features of your MG6250 (e.g., entering a zone name), you will be required to enter decimal and hexadecimal values using the console's keypad and arming keys.

Decimal and Hexadecimal Values

Table 13 describes the console's alphanumeric key inputs.

Table 13: List of alphanumeric key inputs

Key	Value or Action	Key	Value or Action
1	1/special characters (+ - / @ * .,:_#)	0	0
2	A/B/C/2		Inserts a space
3	D/E/F/3	OFF	Deletes character which precedes cursor
4	G/H/I/4	STAY	Toggles between uppercase and lowercase characters
5	J/K/L/5	SLEEP	Allows entry of special characters (see table 14)
6	M/N/O/6	*	Clears entire entry
7	P/Q/R/S/7	#	Accesses next menu or section
8	T/U/V/8	△	Moves cursor one step forward
9	W/X/Y/Z/9	▽	Moves cursor one step backward

Keypad Letter Assignment

Table 14: Keypad letter assignment

Key	Press Key Once	Press Key Twice	Press Key Three Times
1	A	B	C
2	D	E	F

Installation

Wall-mount Installation

The MG6250 can be mounted on a wall. Secure the MG6250 back plate using appropriate mounting hardware as shown in figure 8.

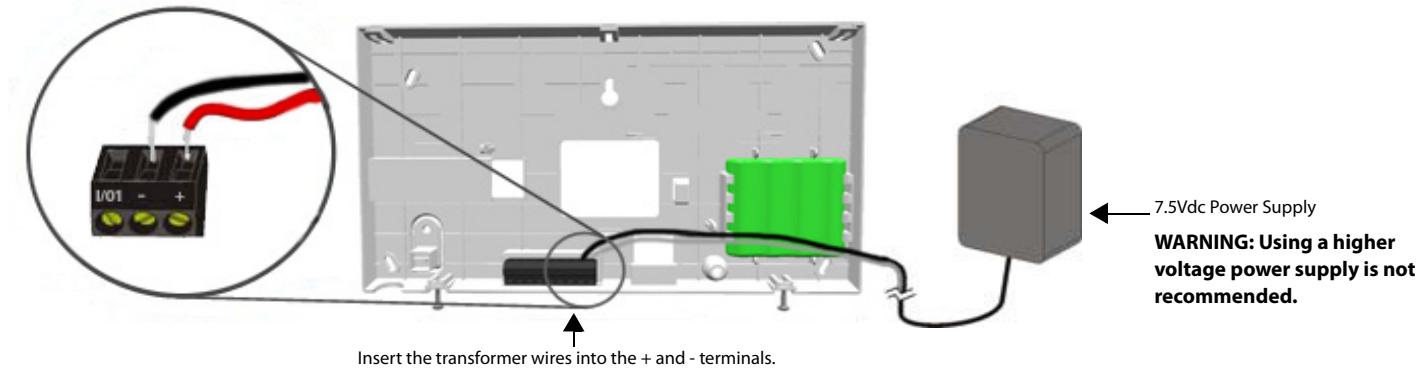

Figure 8:

DC Power

The MG6250 can be powered through a DC power supply. Connect the transformer wires of the 7.5Vdc power supply to the + and - terminals to power the console (as shown in figure 9).

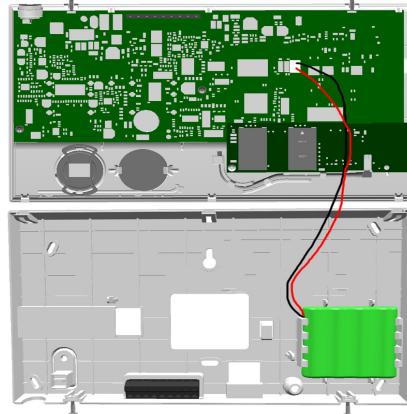

Figure 9: Connecting the DC Power Supply

Backup Battery Pack

The MG6250 uses a backup battery pack to provide power during a power loss. A 4.8V, 1200mAH NiMH (Nickel Metal Hydride) rechargeable battery pack is included with the console. Connect the battery pack as shown in figure 10.

Figure 10: Connecting the Backup Battery

To order a battery pack, the battery pack's part number is: Paradox #0781200148.

NOTE: The backup battery can support the MG6250 during a power failure for 16 hours when in standby mode.

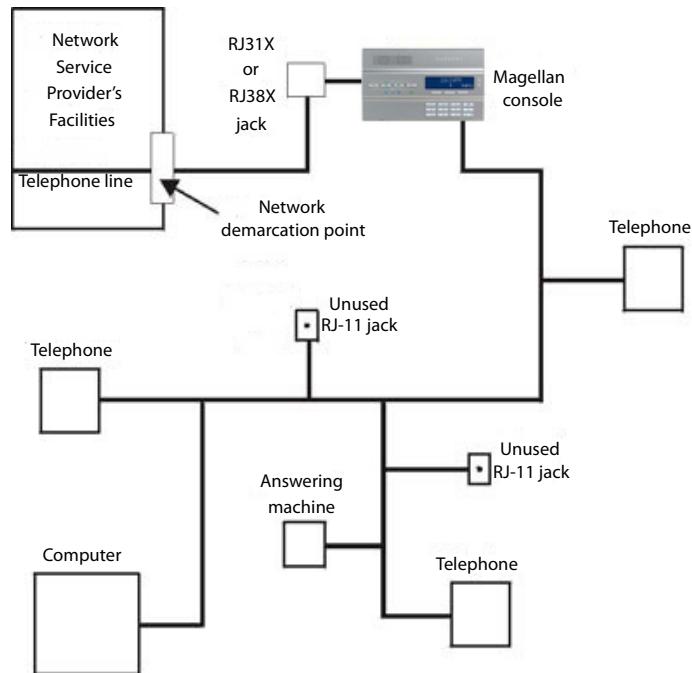

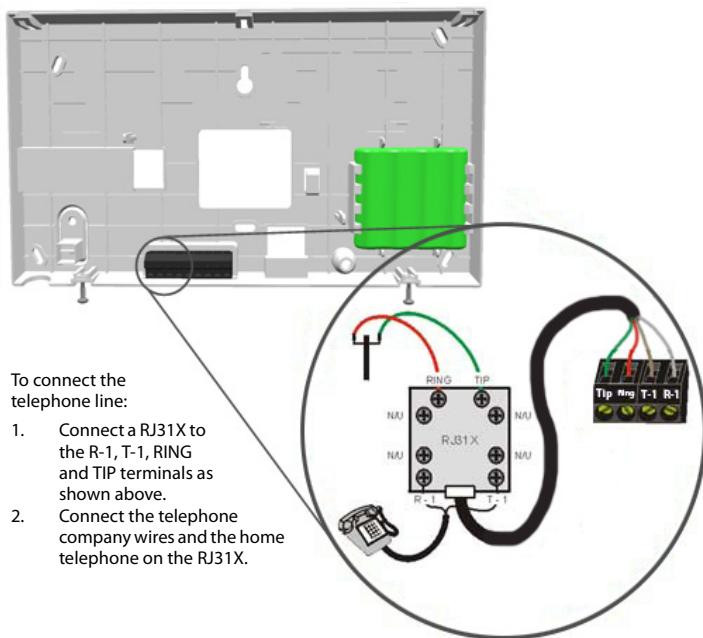

Telephone Line Connections

The MG6250 console can be connected to a telephone line by connecting the telephone company's wires directly to the dialer of the console.

Direct Connect

Connect the telephone line through a RJ31X jack as shown in figure 11.

Figure 11: Telephone Line Direct Connect

Programmable Outputs (PGMs)

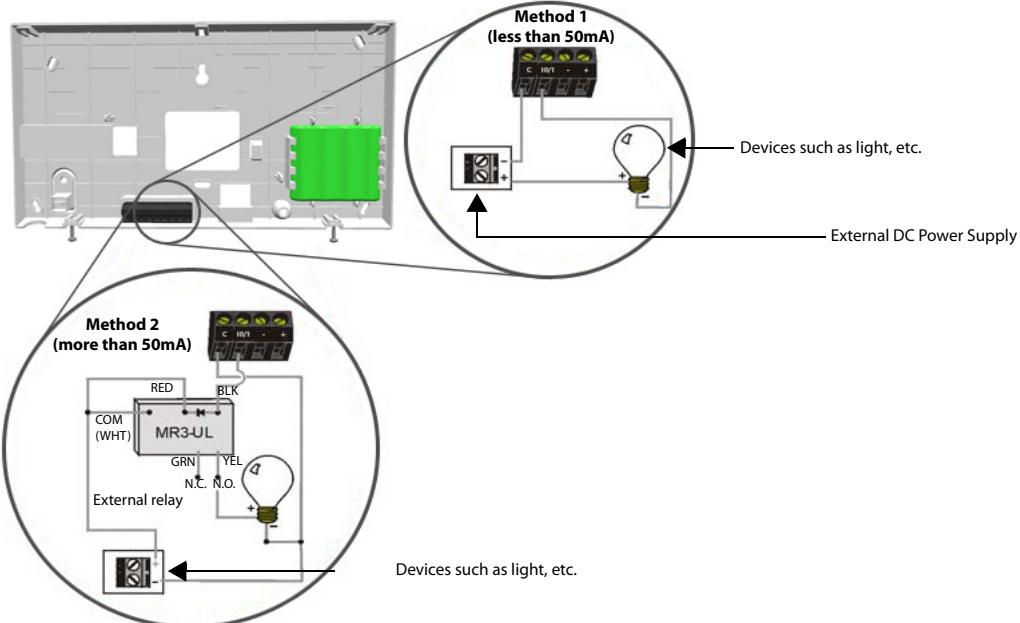

The MG6250 comes equipped with two 50mA open-collector outputs; Max. handling current 50mA. When a specific event occurs in the system, a PGM can be programmed to activate lights, garage door openers, etc. See *PGM Options* on page 10 for more information on programming PGMs.

Connect the MG6250 PGM outputs as shown in Method 1 in figure 12. Since the MG6250 does not come with a power supply, an external power supply must be employed to power the circuit.

If the current draw on the PGMs is to exceed 50mA, we recommend using an external relay as shown in Method 2 in figure 12. For connecting the PGM2, see figure 13.

NOTE: Using Method 2, connect the device to the output terminal of the external relay that matches the normal state of the MG6250's PGM output. Keep in mind that the maximum voltage of PGM1 and PGM2 is 12Vdc.

Figure 12: PGM1 and PGM2 Connections

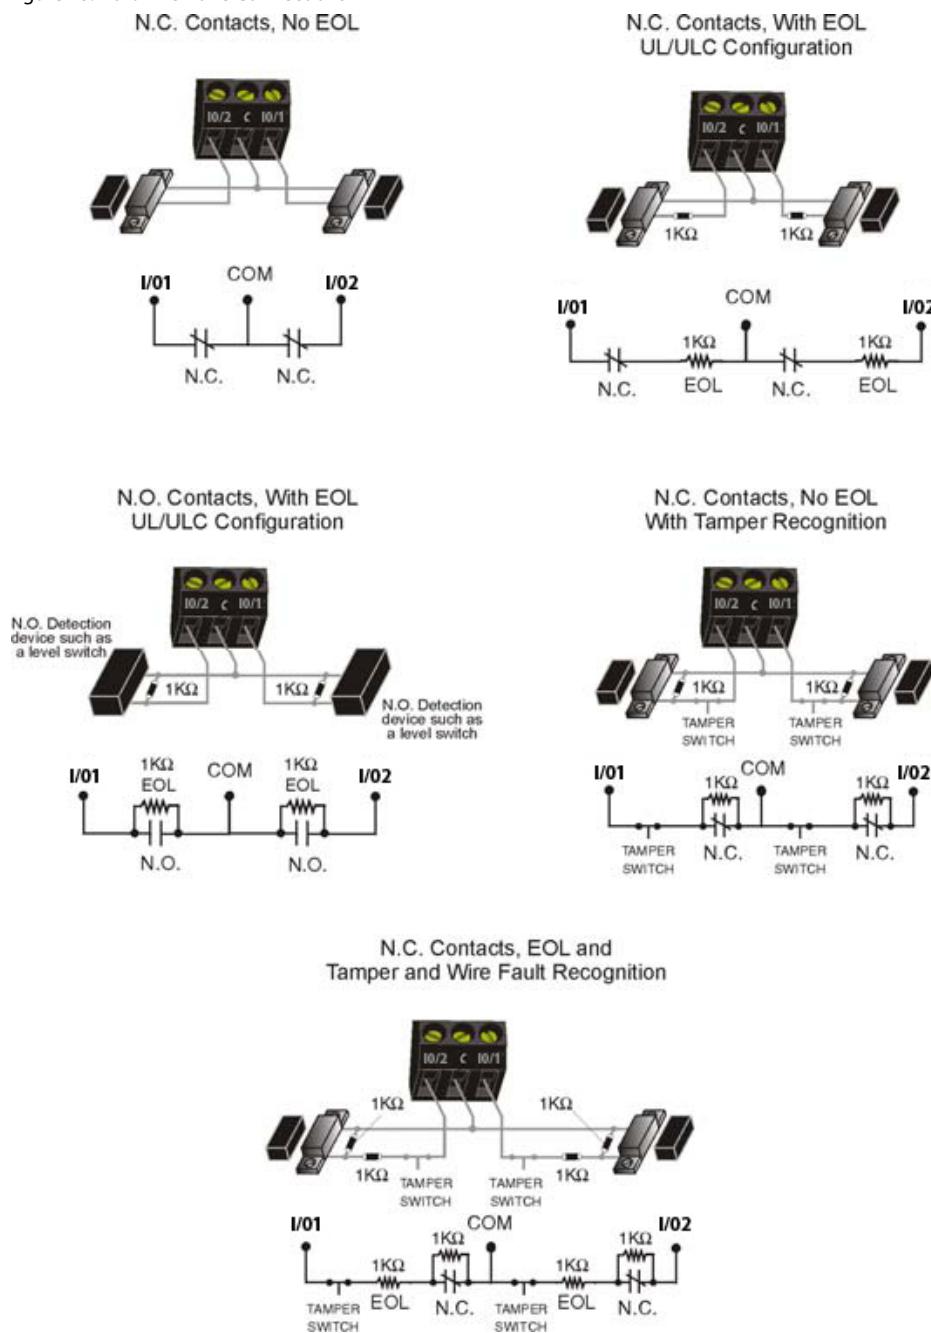

Hardwire Zone Connections

The MG6250 comes with two on-board hardwire zones. The two zones are multiplexed with PGMs. You can use 2 inputs, one input and 1 PGM or 2 PGMs. You can connect hardwire detection devices such as door contacts to the console's zone terminals. Connect the detection devices as shown in figure 13. Please note the following:

- After connecting the detection devices, the zones must be defined. See *Zone Programming* on page 6 for more information.
- The hardwire zones follow the console's EOL and tamper definitions.

NOTE: Though any hardwire detection device can be connected to the MG6250's on-board hardwire zone inputs, it is recommended that only devices that do not require a power source (i.e., standard door contacts) be connected. Since the MG6250 has no power supply, an external power supply would have to be connected in order to power hardwire detection devices that do require a power source.

Figure 13: Hardwire Zone Connections

Appendix A: EN 50131 Programming

The following sections describe all the programming required for your console to be EN 50131 compliant.

IMPORTANT: To set your panel to be EN 50131 compliant, enter section [9003].

The following sections and options (**in bold**) are those that are new or need to be modified for EN 50131 compliancy.

System Timers

Section	Description	Data (value from 000 to 255)	Default Setting
[2020]	Entry delay 1	____/____/____ seconds	045 sec.
-	-	-	-
[2042]	EN50131 fail to communicate timer	____/____/____ seconds	120 sec.
[2043]	Keypad Lockout	____ / ____ attempts	5 attempts
[2044]	Keypad Lockout Duration	____ / ____ minutes	15 minutes
[2048]	Trouble Shutdown	____ / ____ times	5 times
[2049]	Panic Shutdown	____ / ____ times	10 times

General Options "A"

Section	Option	Description	OFF	ON
[2000]	1	Access code length	<input type="checkbox"/> 6 Digits	▲ 4 Digits
	2	Audible trouble warning (except AC power failure)	▲ Disabled	<input type="checkbox"/> Enabled
	3	AC power failure warning	▲ Disabled	<input type="checkbox"/> Enabled
	4	Lock master code	▲ Disabled	<input type="checkbox"/> Enabled
	5	Console tamper supervision	<input type="checkbox"/> Disabled	▲ Enabled
	6	Code necessary to bypass zones	<input type="checkbox"/> Disabled	▲ Enabled
	7	Partition	▲ Disabled	<input type="checkbox"/> Enabled
	8	Future use	-	-

General Options "C"

Section	Option	Description	OFF	ON
[2002]	1	Volume boost on entry/exit	▲ Disabled	<input type="checkbox"/> Enabled
	2	Volume boost in speaker phone mode	<input type="checkbox"/> Disabled	▲ Enabled
	3	Check-in supervision time	<input type="checkbox"/> 24 Hrs.	▲ 80 minutes
	4	RF jamming supervision	<input type="checkbox"/> Disabled	▲ Enabled
	5	Daylight savings time	▲ Disabled	<input type="checkbox"/> Enable
	6	Trouble latch	<input type="checkbox"/> Disabled	▲ Enabled
	7	Need code to view troubles/events	<input type="checkbox"/> Disabled	▲ Enabled
	8	Bell squawk when installer enters programming	<input type="checkbox"/> Disabled	▲ Enabled

Arming/Disarming Options

Section	Option	Description	OFF	ON
[2003]	1	Bell squawk when arming/disarming with remote control	▲ Disabled	<input type="checkbox"/> Enabled
	2	Stay arming switches to Force Stay arming	<input type="checkbox"/> Disabled	▲ Enabled
	3	Sleep arming switches to Force Sleep arming	<input type="checkbox"/> Disabled	▲ Enabled
	4	Full arming switches to Force Full arming	<input type="checkbox"/> Disabled	▲ Enabled
	5	Report system disarming	<input type="checkbox"/> Always	▲ After alarm only
	6	One-touch Stay arming	▲ Disabled	<input type="checkbox"/> Enabled
	7	One-touch Sleep arming	▲ Disabled	<input type="checkbox"/> Enabled
	8	One-touch Full arming	▲ Disabled	<input type="checkbox"/> Enabled

Wireless Module Options

Section	Option	Description	OFF	ON
[2004]	1	Future use	-	-
	2	Report Zone restore	<input type="checkbox"/> On bell cut-off	▲ On zone closure
	3 & 4	Tamper recognition options (console tamper follows this option)	3	4
		Disabled	OFF	OFF
		Trouble only	OFF	ON
		Disarmed: Trouble only Armed: Follow zone's alarm type	ON	OFF
		Disarmed: Audible alarm Armed: Follow zone's alarm type	ON	ON
	5	Generate tamper trouble if detected on bypassed zone	▲ Disabled	<input type="checkbox"/> Enabled
	6 & 7	Wireless transmitter supervision option	6	7
		Disabled	OFF	OFF
		Trouble only	OFF	ON
		Disarmed: Trouble only Armed: Follow zone's alarm type	ON	OFF
		Disarmed: Audible alarm Armed: Follow zone's alarm type	ON	ON
	8	Generate supervision trouble if detected on bypassed zone	▲ Disabled	<input type="checkbox"/> Enabled

General Options

Section	Option	Description	OFF	ON
[2009]	1	Restrict Arming when zone opens during exit delay	<input type="checkbox"/> Disabled	▲ Enabled
	2	Acknowledge Trouble(s) before Arming	<input type="checkbox"/> Disabled	▲ Enabled
	3	Future Use	-	-
	4	Future Use	-	-
	5	Future Use	-	-
	6	Future Use	-	-
	7	GSM Antenna*	▲ Internal	<input type="checkbox"/> External
	8	RF Frequency**	▲ 868 MHz	<input type="checkbox"/> 433 MHz

* If you are using a GPRS14 on an 868 MHz console, you cannot use GSM as a communication method when armed, unless an external antenna is connected.

Once the antenna is connected, you must set section [2009], option [7] to 'ON', or 'external'.

** The frequency of the console cannot be changed, but must be programmed accordingly. Refer to the sticker on the console to view the set frequency, then program it in option [8].

Further Requirements

Certain System Timer values can be modified as long as the respect the following criteria:

- [2020]-[2021] = Entry Delay maximum value is 45 seconds
- [2024] = Auto-zone Shutdown value must be between 3 and 10 times
- [2027] = Power Failure Report Delay maximum value is 60 minutes
- [2042] = EN 50131 FTC timer maximum value is 120 seconds
- [2043] = # of invalid codes before lockout value must be between 3 and 10 attempts
- [2044] = Keypad lockout duration minimum value is 2 minutes
- [2048] - Trouble Shutdown value must be between 3 and 10 times
- [2049] - Panic Shutdown value must be between 3 and 10 times
- [2111]-[2121] Bell cut-off Delay must be between 90 seconds and 15 minutes

Technical Specifications

Power input	7.5 Vdc (PA7 Power Adapter Plug)
Battery pack*	4.8V NiMH, rechargeable
Operating temperature	0°C to 50°C (32°F to 122°F)
Humidity range	5 to 90%
GPRS14 specs	Quad-band GPRS/GSM module with two SIM cards
Interconnection types	TIP-Ring, T1, R1, I/O2, I/O1, C, -, +, battery
Current consumption	Standby: 150mA, maximum: 1A
Prioritisation of signal and message processing and indications	1. Alarm, 2. Trouble, 3. System Status
User code details	All numbers for 0000 to 9999 are valid giving a total of 10 000 possible combinations
EN50131 compliancy details	For compliance to EN 50131 standards: 1) All equipment connected to the I&HAS must be of appropriate Grade 2) Programming must be as specified in the programming guide; otherwise, product marking indicating EN50131 compliance must be removed.
Life of memory support battery	Memory life is not battery dependent
Dimensions (L x W x D)	21.8 x 14.7 x 3.6 cm (8.6 x 5.8 x 1.4 in.)
Weight	670 grams (1.48 lb)
EN 50131-1 & EN 50131-3 (Environmental Class Grade 2)	EN 50131-1 & EN 50131-3 (Security Grade 2, Environmental Class II, Certification body: Intertek)

*CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT BATTERY TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Warranty

For complete warranty information on this product please refer to the Limited Warranty Statement found on our Web site: www.paradox.com. Your use of this Paradox product signifies your acceptance of all warranty terms and conditions.

Patents

One or more of the following US patents may apply: 7046142, 6215399, 6111256, 6104319, 5920259, 5886632, 5721542, 5287111, and RE39406. Canadian and international patents may also apply.
